

Concrete Washwater Treatment for Construction Sites

Siltbuster Ltd are the market leaders in providing rapidly deployable environmental protection using the UK's largest fleet of portable, modular treatment solutions.

Our concrete washwater treatment systems are trusted across the industry for their robustness and decades of R&D. Siltbuster units automatically neutralise the high pH water and remove the solids, making the water safe to discharge.

- Fully automated pH correction
- CO₂ offers lowest cost option for pH correction
- Gas cylinders are safe and easy to handle on site
- No corrosive liquid chemical storage or specialist training required
- Long life rechargeable battery powered option
