

Oil/Hydrocarbon Treatment for Contaminated Water

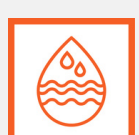

Siltbuster Ltd are the market leaders in providing rapidly deployable environmental protection using the UK's largest fleet of portable, modular treatment solutions.

Our range of oil/water separation equipment includes tilted plate, coalescing and Dissolved Air Flotation (DAF) units to deal with a range of contaminants.

- Able to handle suspended solids loading without clogging
- Reduces disposal volumes by concentrating separated oils
- No filters to block and replace, no consumable costs
- Forklift slots and lifting points make positioning easy
- Multiple treatments can be combined to create a bespoke treatment 'train'
